Re.: Notice to file corrected application paper – replacement abstract

Please note that the attached replacement abstract should be inserted in compliance with 37 CFR 1.72(b) on a separate sheet after the claims of the above mentioned patent application.

## Abstract of the disclosure

The present invention relates to DNA and polypeptide constructs and related methods useful for sequestering and/or purifying polypeptides. In particular, the invention relates to hybrid polypeptides comprising a polypeptide of interest linked to a polymerisable polypeptide, a method of sequestering and/or purifying a polypeptide of interest using the hybrid polypeptide and related hybrid nucleic acids, transformed cells and libraries.
